

The Sizewell C Project

1.2 Application Form

Revision: 1.0
Applicable Regulation: Regulation 5(1) and Schedule 2
PINS Reference Number: EN010012

May 2020

Planning Act 2008
Infrastructure Planning (Applications: Prescribed
Forms and Procedure) Regulations 2009

Application for Development Consent for Nationally Significant Infrastructure Projects under the Planning Act 2008

* required information

Application Form

Please read guidance documents relating to the submission of applications prior to completing this form including [government guidance](#) and the Planning Inspectorate's [Advice Note Six: Preparation and submission of application documents](#).

* Do you have a reference number?

Yes No

* Reference number

1. Applicant

* Organisation

Address

* Building number or name

* Street

* City or town

County or administrative area

* Postcode

* Country

* Name of contact

* Telephone number

Fax number

* Email

2. Agent

* Are you an agent acting on behalf of the Applicant?

Yes No

3. Fee

* State the arrangement for the application fee payment:

BACS CHAPS Cheque

* Please provide payment reference details

Continued from previous page...

4. Confirming why the Planning Inspectorate should receive the application

* Brief statement to explain why this application is, or is to be treated as, a development for which development consent is required under the Planning Act 2008

This application is for a Development Consent Order (DCO) to enable the Applicant to construct, operate and maintain a generating nuclear power station together with associated development in the Sizewell area of East Anglia: the Sizewell C Project.

Sizewell C would be a non-offshore generating station in England having a capacity of more than 50 megawatts (MW) and, as such, is a nationally significant infrastructure project (NSIP) for the purposes of sections 14(1)(a) and 15(2) of the Planning Act 2008 (the Act).

As Sizewell C would be an NSIP, an application for a DCO must be made to the Secretary of State under section 37 of the Act. Section 115 of the Act allows the Secretary of State to grant development consent for associated development falling within that section.

5. Non-technical description of the Proposed Development

* Brief non-technical description of the Proposed Development

The proposed Sizewell C nuclear power station would comprise two United Kingdom European Pressurised Reactor (UK EPR™) units with an expected net electrical output of approximately 1,670 MW per unit, giving a total site capacity of approximately 3,340MW. The design of the UK EPR™ units is based on technology used successfully and safely around the world for many years, which has been enhanced by innovations to improve performance and safety. The UK EPR™ design has passed the Generic Design Assessment process undertaken by United Kingdom (UK) regulators (Office for Nuclear Regulation and Environment Agency), and has been licenced and permitted at Hinkley Point C. Once operational, Sizewell C would be able to generate enough electricity to supply approximately six million homes in the UK.

In addition to the key operational elements of the UK EPR™ units, the Sizewell C Project comprises other permanent and temporary development to support the construction, operation and maintenance of Sizewell C. The key elements are the main development site, comprising the Sizewell C nuclear power station itself, offshore works, land used temporarily to support construction including an accommodation campus, the enhancement of sports facilities in Leiston, fen meadow and marsh harrier compensation land, and a series of off-site associated development sites in the local area. These are:

- two temporary park and ride sites; one to the north-west of Sizewell C at Darsham (the 'northern park and ride'), and one to the south-west at Wickham Market (the 'southern park and ride');
- a permanent road to bypass the A12 through Stratford St Andrew and Farnham (referred to as the 'two village bypass');
- a permanent road linking the A12 to the Sizewell C main development site (referred to as the 'Sizewell link road');
- permanent highway improvements at Yoxford and other road junctions;
- a temporary freight management facility on land to the south-east of the A12/A14 junction; and
- a temporary extension of the existing Saxmundham to Leiston branch line into the main development site the ('green rail route') and other permanent rail improvements on the Saxmundham to Leiston branch line.

6. Location or route of the Proposed Development

* Description of location of application site(s), or route of development (reference to appropriate plans)

The main development site (power station site) would be at Sizewell, Suffolk, adjacent to the existing Sizewell B power station and decommissioning Sizewell A power station. The off-site associated development would be located in the surrounding area: park and ride facilities at Darsham (north) and Wickham Market (south); a two-village bypass to the south-east of Farnham and Stratford St. Andrew; the Sizewell link road to the south of the B1122 to bypass Theberton and Middleton Moor; a roundabout at Yoxford between the A12 and B1122 and

Continued from previous page...

various other highway improvements to the local road network; a freight management facility along the A14 between Ipswich and Felixstowe; and the new green rail route and upgrades to the Saxmundham to Leiston branch line located to the west and north of Leiston.

* Is the site a single site or a linear site?

- Single site Linear site

22. Additional information for specific types of infrastructure

Continued from previous page...

* Additional information is required to be submitted in accordance with Regulation 6 of The Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009:

Yes No

* Provide a brief description

This application is for the construction of a non-offshore generating station. Additional information required is a statement of persons responsible for design and construction of the electricity grid connection.

The associated development includes, amongst other things, highway and railway works, the creation of harbour facilities and the creation of a hazardous and non-hazardous waste compound. Whilst the Applicant is not required to submit additional information pursuant to Regulation 6 of the APFP Regulations in respect of these works, it has nevertheless chosen to provide the information throughout the application for development consent.

* Document reference

7.1 Grid Connection Statement

7.2 Regulation 6 Additional Information

Remove this reference

Add another reference

Regulation 6 of the Infrastructure Planning (Applications: Prescribed Forms and Procedures) Regulations 2009 requires additional information to be submitted with the following types of development.

* Please check any of the following boxes that apply:

- Construction or extension of a non offshore generating station (Reg. 6 (1a))
- Construction or extension of an offshore generating station (Reg. 6 (1b))
- Highway related development (Reg. 6 (2) (part 1))
- Construction or alteration of a railway (Reg. 6 (2) (part 2))
- Construction or alteration of harbour facilities (Reg. 6 (3))
- Construction of a pipeline (Reg. 6 (4))
- Construction or alteration of a hazardous waste facility (Reg. 6 (5))
- Construction of a dam or reservoir (Reg. 6 (6))

Construction or extension of a non offshore generating station (Reg. 6 (1a))

* Provide details of the proposed route and method of installation for any cable

Not applicable – see Grid Connection Statement (Doc Ref 7.1) for additional information required regarding a statement of persons responsible for design and construction of the electricity grid connection.

* Provide a statement as to whether applications will be made for safety zones

Not applicable – see Grid Connection Statement (Doc Ref 7.1) for additional information required regarding a statement of persons responsible for design and construction of the electricity grid connection.
